

SEPTEMBER 2026 / ENGLISH EDITION

Research supply. Built around your specification.

Company profile & product catalog

Peptide materials and supporting research supplies
for qualified laboratories and B2B partners.

Research use only. Not for human or veterinary use.

01 / COMPANY

From product inquiry to coordinated supply.

CelluPep supports laboratories, biotechnology companies, scientific distributors and sourcing partners with catalog materials, custom peptide projects and bulk supply coordination.

Our manufacturing-led approach connects specification review, production planning, analytical documentation and shipment coordination. Project scope, specifications and availability are confirmed with the team before an order is finalized.

IN THIS CATALOG

Company & supply approach

02-05

Selected product highlights

06-07

Illustrated product directory

08-16

Project brief & contacts

17

02 / CAPABILITIES

One brief. Connected capabilities.

Catalog, custom and bulk projects start with the same clear specification.

Production equipment / existing website media

01

Review

Product identity, sequence, format and target specification.

02

Coordinate

Synthesis, purification and final format against the agreed brief.

03

Document

Ask for the applicable batch records and analytical documents.

04

Supply

Confirm packaging, destination and dispatch arrangements.

03 / DOCUMENTATION

A product is only part of the story.

Match the material, batch and document before making a sourcing decision.

01 Product identity

Confirm the requested name, sequence or reference and the scope of identity testing.

02 Analytical scope

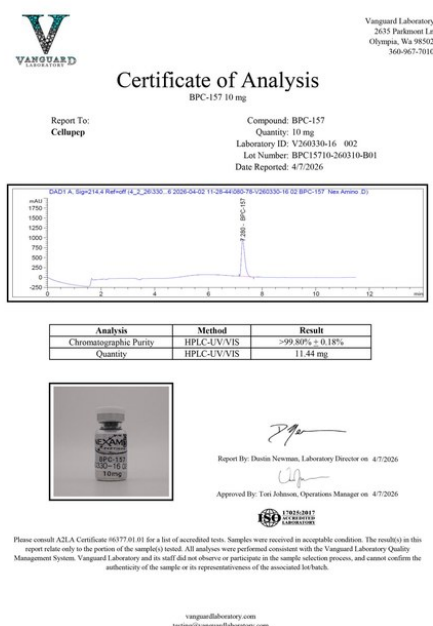

Discuss HPLC, mass-spectrometry and other analytical records required by your project.

03 Batch connection

Check that the report identifiers relate to the batch being supplied.

04 Document review

Request the complete applicable record and review it through your organization's process.

Published report example BPC-157 / Vanguard

Source-published image, shown for document-format reference only. It does not certify the company or other batches. Independent laboratory authenticity has not been verified.

NEED A SPECIFIC COA?

Send the product name and batch number. Catalog purity statements are not a substitute for a batch-specific analytical record.

[View published quality information](#)

A clear view of the catalog.

Research materials, mixtures and supplies are presented separately from service inquiries.

66

Product listings in this edition

Consolidated from the current website product records. The directory is alphabetical for easy lookup.

Catalog materials

Named peptides and other research compounds.
Packaging options appear with each entry.

Blended listings

BB, CS, GLOW, KLOW and related named mixtures remain identifiable by their website listing.

Supporting supplies

Water preparations and other non-peptide supplies are included without implying that they are peptides.

Custom & bulk projects

Custom synthesis and raw-material supply are service routes. Submit a brief rather than treating them as fixed SKUs.

Reading note: quantities are catalog packaging options, not directions for use. Confirm identity, purity, quantity, pack format, availability and lead time in the quotation.

05 / PRODUCT HIGHLIGHTS

Selected from the portfolio.

A visual introduction to selected listings. Full packaging options follow in the directory.

Tirzepatide

Multiple catalog quantities - see directory

Retatrutide

5 mg / 10 mg / 15 mg / 20 mg / 30 mg / 40 mg / 50 mg / 60 mg / 100 mg

BPC 157

2 mg / 5 mg / 10 mg / 20 mg

GHK-CU

50 mg / 100 mg
